PEANUTS

We are...

- America's 7,000+ peanut farming families
- Improving the economic condition of USA peanut farmers through compelling promotion and groundbreaking research

Good news:

America's most popular nut is good for
our health, our planet and our economy.

Affordable Nutrition

Peanuts are a **good source** of fiber, good fats and are an **affordable** plant-based protein.

Research studies confirm that peanuts have a **positive impact** on disease prevention and health maintenance.

Peanuts Shine in Global Cuisine

According to Technomic, peanuts appear on 27% of foodservice menus, but when you consider only ethnic concepts, that number jumps to 31%.

Resources for Food Allergen Management

For evidence-based information on managing food allergens
visit PeanutAllergyFacts.org.

Peanut Sustainability:

- Zero-waste plant
- Require the least amount of water to produce than any other nut
- Smallest carbon footprint of any nut
- Unique ability to improve soil quality and benefit other crops
