

Smart Pizza the new generation of Pizza Distributor using industry standard technology for reliable 24/7 operation.

Designed to produce the same quality of pizza as in restaurants, it is the only machine on the market with a deck oven. For a continuity of service and a preserved taste! A heating element serving as a grill is also part of the cooking system to fully cook pizzas when required. Smart Pizza's unique system allows the pizza to bake out of its cardboard box to preserve taste and crispiness.

A fully customizable point of sale!
